SATYAM KUMAR

SUPPLY CHAIN STRATEGY • LOGISTICS ENGINEERING • TRANSPORTATION PLANNING

Mumbai, India | +91-6370178077 | kr.satyam112@gmail.com | LinkedIn

EXECUTIVE PROFILE

Supply chain and logistics leader with 8+ years across FMCG and e-commerce, running end-to-end logistics for a ₹150 Cr+ annual-spend zone (7 depots, 25 direct reports, ~3,500 customers). Combines ground-level execution with a self-built analytics practice — Python-based network optimization, Six Sigma DMAIC, and automated planning tools — to convert operational data into cost, service and capacity decisions. Delivered ~₹5.5 Cr in annual logistics savings and identified a further ~₹13 Cr across network, freight and fleet-optimization initiatives, alongside measurable gains in same-day delivery, fill rate, TAT and inventory coverage.

CORE COMPETENCIES

Supply Chain Strategy & Network Design · Transportation Planning & Cost-to-Serve · Control Tower & OTIF/TAT · Depot/Network Optimization · PDP & Fleet/Truck Planning · MHE & Manpower Planning · Inventory Replenishment (ECRS) · SAP TM · Lean / Kaizen / 5S · Logistics Analytics & Automation

PROFESSIONAL EXPERIENCE

Hindustan Coca-Cola Beverages (HCCB) — *Zonal Manager – Logistics / Supply Chain Lead* *Oct 2022 – Present*

- Own end-to-end logistics for the Maharashtra & Goa zone — 7 depots, 25 direct reports, ~3,500 customers — across factories, CFAs and GT / MT / E-commerce / Inter-Unit channels; manage ₹150 Cr+ annual logistics spend.
- Built and ran a Logistics Control Tower for OTIF, carrier performance and deviation monitoring — cut Order-to-Delivery TAT from 52 to 42 hours and delivered ₹13.4M in signed-off logistics savings.
- Improved Same-Day Delivery by 65% while sustaining 97%+ NKA fill rate, contributing to top national performance.
- Led ECRS data strategy and rollout across MEP distributors — cut Mean Days of Coverage from 16 to 12 days and inventory variability (Std. Dev.) from 14 to 6 days.
- Applied K-Means, ILP/MILP and heuristic optimization to redesign the Southwest Cluster network (9 new depot locations), identifying ~₹9.24 Cr in network savings; separately restructured Maharashtra freight rates and dedicated-fleet contracts for a further ~₹4.1 Cr.

Flipkart — *Operations Lead – Fulfillment Centers* *Sep 2021 – Sep 2022*

- Led Inbound, Outbound, Inventory, Returns and P&L for large 3PL-managed fulfillment centers serving Flipkart & Myntra.
- Partnered with Tech and Product on PAN-India TAAS (Direct Inwarding), balancing peak-volume, vendor-TAT and shelf-life constraints.
- Drove Lean, Kaizen and 5S initiatives to improve throughput and cost efficiency.

Rivigo — *Operations Manager / Ops Team Lead* *Jun 2018 – Sep 2021*

- Progressed from control-tower analytics into on-ground operations leadership across East and North regions.
- Cut accidents ~75% (to 1 per 1.5 lakh km) through driver-behaviour programs, safety interventions and technology adoption.
- Implemented a variable manpower payout model and led union negotiations, achieving ~25% cost reduction.

SELECTED ANALYTICS PROJECTS

Primary Dispatch Planning (PDP): Python/Pandas engine converting weekly volumes into a reconciled 7-day, truck-type dispatch plan.

Transit TAT Dashboard: interactive HTML/JS SLA dashboard for gate-report analysis by carrier, customer and origin.

Depot Location Optimization: k-means++ / DBSCAN / Haversine framework for depot placement, published as an independent white paper (Jul 2025).

TECHNICAL SKILLS

Python (Pandas, NumPy, scikit-learn, geopy, Folium) · K-Means / DBSCAN / Haversine / ILP-MILP · SAP TM · Excel Modeling · HTML/JS Dashboards · Control Tower · ECRS · Lean / Kaizen / 5S

EDUCATION & CERTIFICATIONS

- B.Tech, Electrical Engineering — KIIT University (2014–2018)
- Certified Lean Six Sigma Green Belt — ASCB-USA
- SAP S/4HANA Cloud Public Edition – Transportation Management (Intermediate)
- CS50 – Computer Science for Business Professionals (2022–2023)

PUBLICATION

Mathematical Formulation of Depot Location and Customer Assignment Using Python — July 2025
